**SYM Naval** is a marine technical services company founded in 2011 specialising in maritime consultancy and outsourcing.

Over the last few years SYM Naval has expanded its technical capabilities by developing and increasing its operations in shipbuilding, conversion, repairs and maintenance.

SYM Naval has grown into a leader in the maritime sector and has gained recognition, both in Spain and abroad, for the quality of its work and its capabilities. It has worked with clients from all over the world since it was founded.

### **Structure**

SYM Naval is headquartered in Vilanova i la Geltrú (Spain) and also has offices in Miami and Santo Domingo, where it provides repair and maintenance services in its own workshops.

### **Market**

At the beginning, SYM Naval focused on maritime repairs. In 2015 it then started building harbour vessels. Following this course, the company has established itself as a shipbuilder and has provided repair services in countries such as Trinidad and Tobago, Brazil, Singapore, and Uruguay. Its main markets are large vessels and harbour vessels in the Mediterranean and cruise ships in the Caribbean.

### **Facilities**

SYM Naval operates in the busiest maritime hubs. The company has a shipyard and facilities in the province of Barcelona, in the port of Vilanova i la Geltrú where it provides coverage to the Mediterranean area. Likewise, SYM Naval also has offices in Santo Domingo (Dominican Republic), where it offers services in the Caribbean area from its facilities in the Andrés Caucedo free zone.

### **Services**

Although SYM Naval started out providing professional maritime consultancy and outsourcing services to shipyards, vessels, and vessel owners, over the years it has specialised in other services. These include dry docking and wet docking services, technical services to cruise ships via riding squads, shipbuilding, technical office, load testing by means of utm and NDT water bags.

### **Line of boats**

SYM Naval builds two important lines of vessels for port use, the OIL TANKER line, destined for the collection of Marpol I, IV, V and VI waste and the HARBOR TUG line, consisting of tug boats up to 2x265 Kw of power.

### **Clients and partners**

SYM Naval has provided services to more than 200 clients, including such important names as the Astander Shipyard, Repasa, the Boluda Maritime Corporation, Columbia Cruise Ship Management, Wilhelmsen Ship Management, Bulkship Management, TE Subcom, and Carboflotta.

### **Our team**

SYM Naval has a highly professional team that use their extensive experience and expertise to offer the highest quality in upholding the company's values and meeting its goals.

In Spain, SYM Naval has a permanent workforce and also works with partner companies to carry out some of its projects. In the Dominican Republic, the team features a permanent workforce and occasionally expands to include up to 130 additional experts either hired directly or through partner companies. Lastly, the company has a mobile team which travels from Barcelona or Santo Domingo to anywhere in the world to provide on board repair services.

### **Quality**

SYM Naval's vision lies in taking on challenging naval engineering projects that can offer high-quality technical solutions to complex problems.

SYM Naval specialty lies in the custom shipbuilding using only the best materials and the most cutting-edge systems and equipment on the market.
